# Walking Safaris

There is no better way to experience the "African bush" than on foot, engaging all of your senses: the whisper of the grass, the smells of the soil, the sights of animals.

Guided experiential safaris usually over 3-5 days

Experiential & authentic itineraries suitable for everyone.

Accommodation in fully equipped and staffed tented camps

Exclusive private experience (max 6-8 guests)

Four star meals

Customized with other activities (game drives, boat drives and others)

We are the first and the original walking safari in this area of Africa

# Walking Experience

"Back to basics"

Walking safaris are active, adventurous, and give you the freedom to explore areas unreachable by car.

Typically, we walk about 3-5 hours every day: a leisurely exploration in which you immerse your senses in nature.

During the walk, you can expect to see a variety of wildlife (antelopes, elephants, buffaloes, giraffes). You will learn about (and touch, smell, observe and hear) a variety of plants, trees, birdlife,, and insects. In some areas, we will track animals by their footprints and droppings.

Every walk is unique as the bush habitat changes continually and is shaped by dry and wet seasons.

# A day on a walking safari...

While our program is fully customizable based on your preferences, here is what a typical day of bush exploration may look like

**Bush walk** during ideal morning hours starting around 7 am,, typically lasting between between 2.5 to 4 hours. **Breakfast** is served either prior to your walk or during the break later on.

Midday **rest** in the camp, where **fresh lunch** is served. Variety of books and games are available.

**Afternoon shorter walk** (1-2 hours) around the camp or a **game drive**, followed by a stunning **sundowner** at Nyamsika viewpoint, and a full course **dinner** in the camp.

Alternative activities can include a **boat ride** on the Nile River and a visit to the **Top of the Falls**.

# Area Map

a sample of our walking routes in the northern part of Murchison Falls. The walks range from 2 to 12 km.

We tailor our walking safari routes every time we go out to take into account weather, terrain conditions, and your preferences. The walks span a variety of habitats and types of vegetation, ranging from grasslands, borassus palm/acacia trees, dry riverbeds, and woodlands.

# Responsible Tourism

We follow a simple but rigorous set of principles to make sure that our tourism activities benefit travelers, nature, and local communities.

**Low Impact Tourism** - We operate visit pristine natural areas, and we minimize our impact with our lightweight and "leave no trace" tented camps. We travel only in small groups (max 6-8 people)

**Awareness & Education** - We are your guides to make your trip memorable. We also hope that you will learn plenty about local socioeconomic and conservation issues. Conservation work has been our passion for two decades.

**Carbon Neutral** - We measure our carbon impact and our operations are fully offset. These funds support directly wildlife conservation.
